

## Circular economy rPET packs for dairy and an array of other food products, where sealed in freshness is essential.

PFF has invested in world-first, cutting-edge thermoforming technology for the manufacture of IMPAC-T packaging.

IMPAC-T is made from rPET - giving industries like dairy an opportunity to switch from traditional polypropylene to circular economy packaging.

### IMPAC-T Packaging Credentials:

- Unique 95mm & 86mm card-wrap pack.
- Plastic: minimum 50% post-consumer recycled PET with the ability to reach 100%.
- Card: up to 100% post-consumer waste with any virgin content sourced from certified sustainable forestry.
- Fully integrated, inline manufacturing for reduced carbon footprint against existing alternatives.
- Easy separation for onward recycling.
- Supported by PFF's design and graphics studio.
- Not subject to the Plastic Packaging Tax.
